Drew Krehel
Development Associate
Supernova Technology

Dear Hiring Manager:

Throughout my career, I have built a reputation for quickly learning complex systems, improving workflows, and helping teams solve challenging problems. I am excited to bring those strengths to the Development Associate role at Supernova Technology. My career has been built on learning quickly, managing complex workflows efficiently, and delivering accurate results under pressure—qualities that align strongly with Supernova's emphasis on continuous learning, cross-functional collaboration, customer success, and operational excellence.

Throughout my professional background in video production, technical artistry, project coordination, and data-sensitive environments, I developed a strong foundation in disciplined execution, process improvement, and maintaining high standards in fast-paced settings. As a Technical Artist and VFX professional, I regularly managed intricate, deadline-sensitive projects that required balancing customer expectations, technical execution, and rapidly changing priorities. At XVP Studios, I implemented and trained staff on the task management tool RoboHead, streamlining workflows and improving team productivity. At Vitality Group, I worked with sensitive medical data, reinforcing my commitment to accuracy, data integrity, and accountability. These experiences strengthened my ability to break down large challenges into manageable systems, communicate effectively with diverse stakeholders, and contribute positively within collaborative teams.

More recently, my Software Development Foundations training through the Discovery Partners Institute strengthened my analytical thinking and technical fluency through hands-on experience with databases, backend systems, and structured problem-solving. This experience further sharpened my ability to approach operational challenges systematically, work with data thoughtfully, and approach business challenges with both curiosity and discipline.

What excites me most about Supernova's Development Program is the opportunity to gain exposure to multiple areas of the business while contributing meaningfully from day one. The chance to work across operations, customer support, product, and technology teams is especially appealing because I enjoy learning how systems, people, and processes work together to create successful outcomes. I am highly motivated to build a long-term career in fintech and believe the program's combination of mentorship, hands-on experience, and professional development would provide an ideal environment for growth.

Thank you for your time and consideration. I would welcome the opportunity to further discuss how my background and strengths align with your team's needs.

Best Regards,
Drew Krehel
